

## House Cleaning Tips

TILE FLOORS: How to brighten tile grout.

1. Mix about a ½ cup of oxygen bleach (high quality) per gallon of water.
2. Take a new/clean string mop dunk it in the bucket of water mixture and take the drenched mop (don't wring it out) and mop it over your high traffic areas.
3. Leave the floors drenched for about 15 minutes to a half hour. The longer the solution has to work the better.
4. Now take the mop wring it out and now mop up the excess water.

SLIDING DOOR TRACTS:

1. A convenient tool to have for this project is a steam cleaner. (I use the Monster Steam Boost)
2. A steam cleaner will have those unsightly door tracts cleaned and sanitized in a few short minutes.
3. You then wipe up the excess water and dirt with a dry microfiber cloth. It's as easy as 123.

What you thought would be a long rigorous project only takes minutes with a steam cleaner.

## Pet Hair Removal

I bet your wondering what trick we have for this process. It's Easy. Just grab your rubber gloves, put them on head towards your sofa. Start passing your hands over the fabric and watch the pet hair miraculously be lifted off the sofa fabric.

## Deep Cleaning

We do suggest the deep cleaning before your regularly scheduled routine cleanings. Especially if it's been about a year since your last deep/spring cleaning. This will entail the hand washing of your ceiling fans, blinds, windows, baseboards, light fixtures, large and small appliances, and much more.

## Initial Cleaning

An initial cleaning is basically your first routine cleaning. How the Initial cleaning differs from a routine is that it usually takes longer to clean your home for the first time. Every home is unique and with every family come different lifestyles so the cleanings differ from home to home. For this reason we need that first visit to be a little longer in order to become familiar with your home and to focus on the appropriate cleaning it requires. This cleaning is used when your home has had a deep cleaning within a year and if you are new clients.

## Routine Cleaning

This type of cleaning is followed by either the Deep or the Initial Cleaning and means that you are placed on a specific day and time (as often as you like) of your choosing with the same cleaning tech(s).

## Testimonials

They were very thorough, the finest cleaning I've ever had and I've had multiple cleaners. They were much more careful and thorough. They were outstanding.

~Joyce C.

Cleaned my entire house (1800 sq ft- 3 bedroom, 2 full bath) I have all tile floors and two long haired cats. They made sure to vacuum prior to mopping the floors. (HUGE PLUS!) They dusted all the furniture. I love the nature products that they use. The ladies are v. professional and hard working. They come in, get the job done and are on their way before you know it.

Excellent. Really great. Will use them again!

~Lisa T.

They were prompt, courteous and easy to work with. I would hire them again and refer them to my friends.

~Ellen W.
